The Group's fourth quarter Net loss was USD 12.1m, compared with USD 6.2m in the third quarter. EBITDA for the quarter was USD 8.8m (loss) and USD 6.0m for the full year. The net loss for the

quarter was impacted by change in inventories, certain transaction related costs, expenditure on the Group's krill vessels and start-up costs at our joint venture factory in Houston.

Our harvesting operation in the Antarctic started in late December with a total of 1,230 metric tons (MT) of krill harvested and 182 MT of Qrill™ Aqua produced in the quarter. The quarter finished on a positive note with a new global sales contract of Superba™ Krill oil. The new contract will contribute to the Group's positive outlook for 2015.

Revenue and other income:

Total revenue and other income decreased by 8% or USD 2.3m compared to the third quarter. The decline in revenue was mainly driven by lower demand in the US- and Australian markets for our Superba™ Krill oil. The sale of Qrill™ Aqua continued to grow, both in volume and price, demonstrating the inherent quality of this product. Total sales volume ended at 108 MT of Superba™ Krill oil and 4,265 MT of Qrill™ Aqua in the quarter.

Operating expenses:

Operating expenses was impacted by Net change in inventories during the quarter. The expense reflects the movement in inventory levels from the third quarter to the fourth quarter. The change implies a decrease in the inventory balance at year end. Operating expenses also reflect incurred costs in connection with the possible US-listing of the parent company Superba ASA that totaled 4.2m for the full year and 0.6m in the quarter, as well as repair and maintenance costs on the Groups' vessels and machinery.

Financial items

The Group's share of the joint venture in Houston impacted Share of loss from equity accounted investees negatively with USD 1.6m in the quarter, reflecting start-up costs on the new factory. Financial income is mainly unrealized gain on our NOK denominated loans, whereas the Finance expenses mainly relate to interest cost on loans and the guarantee fee to Aker ASA for the DNB loan.

Total assets:

Total assets decreased by USD 11,8m compared to the third quarter. The decrease is mainly attributable to lower inventory levels at year end, partly offset by higher receivables and property, plant and equipment. During the quarter the vessels Saga Sea and Antarctic Sea conducted a scheduled yard-stay in Las Palmas. Total investments amounted to USD 11.5m, and were mainly related to upgrades and replacements during the vessel's yard-stay.

Net interest bearing debt

Net interest-bearing debt (interest-bearing loans less cash and cash equivalents) amounted to USD 154.6m in the fourth quarter, up from USD 144.6m in the third quarter following refinancing and repayment of debt. Of the Group's total interest-bearing debt, USD 13.5m is a liquidity loan from Aker ASA.

Outlook for 2015

Future growth depends on the Group's continued success in sales of high-quality dietary supplements by geographic expansion and the ability to develop new krill based product applications. Following the expected completion of the krill oil factory in Houston in first quarter 2015, the Group is fully invested to capture the foreseeable market growth potential.
